

REMARKS

At the outset, Applicant thanks the Examiner for the thorough review and consideration of the subject application. The Office Action of August 10, 2005 has been received and its contents carefully reviewed.

Claims 33 and 34 are withdrawn. Accordingly, claims 1-8 and 24-34 are currently pending. Reexamination and reconsideration of the pending claims is respectfully requested.

In the Office Action, claims 1-8 and 24-32 were rejected under 35 U.S.C. 103(a) as being unpatentable over Applicant's Related Art (ARA) in view of U.S. Patent No. 6,309,081 to Furihata ("Furihata").

The rejection of claims 1-8 and 24-32 is respectfully traversed and reconsideration is requested. Claims 1-8 and 30 are allowable over the cited references in that each of these claims recites a combination of elements including, for example, "a main support containing said liquid crystal display panel and said light guide panel" and "a clamping member fixing said reflector and said main support." Claims 24-27 and 31 are allowable over the cited references in that each of these claims recites a combination of elements including, for example, "a main support" and "a protrusion extending a predetermined distance from a surface of the main support." Claims 28-29 and 32 are allowable over the cited references in that each of these claims recites a combination of elements including, for example, "a main support adjacent to the bottom cover" and "a protrusion extending a predetermined distance from a surface of the main support and engaged with the first hole." None of the cited references including the ARA and Furihata, singly or in combination, teaches or suggests at least this feature of the claimed invention.

In the Office Action, the Examiner admits that the ARA does not disclose "a clamping member fixing said reflector and said main support." The Examiner cites Furihata as disclosing this feature of the claimed invention. Furihata fails to disclose a main support. The clamp 300 in Furihata clamps a diffusing plate 50 and reflecting plate 60 to a light guide plate 20. So Furihata fails to disclose "a clamping member fixing said reflector and said main support." The structure of the clamp 300 does not in any way lend itself to fixing the main support 6 disclosed in the ARA.

Further, the Examiner cites the projections 21 of Furihata as "a protrusion extending a predetermined distance from a surface of the main support." The projection 21 actually projects

from the light guide plate, which is completely different from the claimed projection projecting from the main support.

Accordingly, claims 1-8 and 24-32 are allowable over the cited art.

Applicant believes the foregoing amendments place the application in condition for allowance and early, favorable action is respectfully solicited.

If for any reason the Examiner finds the application other than in condition for allowance, the Examiner is requested to call the undersigned attorney at (202) 496-7500 to discuss the steps necessary for placing the application in condition for allowance. All correspondence should continue to be sent to the below-listed address.

If these papers are not considered timely filed by the Patent and Trademark Office, then a petition is hereby made under 37 C.F.R. §1.136, and any additional fees required under 37 C.F.R. §1.136 for any necessary extension of time, or any other fees required to complete the filing of this response, may be charged to Deposit Account No. 50-0911. Please credit any overpayment to deposit Account No. 50-0911. A duplicate copy of this sheet is enclosed.

Dated: November 10, 2005

Respectfully submitted,

By
